Buck convertor power source (LMR14050):

Designed parameters:

- Source voltage: 4 – 8.4V (Two liion cells)
- Output voltage: 5V
- Output current: 2A (IC maximal continuous current is 5A)
- Output inductance: 2.2 uH, Kind: 33%,
- Switching frequency: 1.5 Mhz (15k8)
- OutC (Vripp: 50mV): 2uF

POWER OUTPUT

RFBT (feedback top resistor values) =====

Bottom value fixed 10k Ohm

68 kOhm – 5.1V
44 kOhm – 3.3V
